

## Electric Car

Electric cars work on electrical energy.

Consider the following questions:

1. What can you use to provide electricity?
2. How does a car move?
3. How can you attach the power source to make a car move?

Answers:

1. What can you use to provide electricity?

Battery.

2. How does a car move?

A car moves when the wheels rotate. Motors can be used to rotate the wheels.

3. How can you attach the power source to make a car move?

Motors can be connected to a battery.
