

Solar Fan

Working Principle

The solar fan works on solar energy. Solar energy needs to be converted into electrical energy.

Consider the following questions.

1. What can you use to convert solar energy into electricity?
2. How will you make a fan?

1. What can you use to convert solar energy into electricity?
Solar panels convert solar energy to electrical energy/ electricity.

2. How will you make a fan?
Look how the fan looks and you can use a plastic bottle, cardboard, or wood.
